University of Phoenix®

IT programs guide

“A University of Phoenix IT program helps prepare you for a career in the growing field of IT, whether you’re just getting started or preparing for new opportunities. You’ll gain career relevant skills in weeks, not years, and can update your professional profile in real time.

An IT degree from University of Phoenix is a strong choice, with curriculum aligned to industry certifications and added benefits like discounts on certification exams. I’m glad you’re here. Take a look around.”

KATHRYN UHLES
Dean, College of Business and IT

Kathryn Uhles collaborated on this guide to introduce students to the transfer-friendly programs, skills-aligned curriculum, experienced faculty and customized experience that await University of Phoenix tech students. Read more about Uhles inside.

Thank you for downloading our IT programs guide!

Our IT programs connect adult learners to what they need to pursue success. This guide will walk you through everything from our skills-aligned programs to our time- and money-savings opportunities to how we compare to the competition.

Our leaders and faculty

Founded in 1976, University of Phoenix became one of the first online universities designed for working adults. And from our earliest beginnings as the University that changed higher education, University of Phoenix has embraced excellence and innovation.

Through academic rigor and deep knowledge of the types of skills employers' value, our leaders in the College of Business and Information Technology are dedicated to helping you succeed in your education.

Our deans

Our deans manage curriculum design and development, faculty support, vendor collaboration and academic operations.

Kathryn Uhles, MSP, MIS
Dean
Passionate about teaching the next generation of tech leaders, Uhles has served University of Phoenix across four different departments since 2006 — most recently as faculty and dean of the College of Business and IT.

J.L. Graff, EdD, MBA
Associate Dean
Excited about helping students pursue their academic and professional goals in IT, Graff has served University of Phoenix in multiple capacities since 2002.

Did you know? College of Business and IT faculty have an average of 32.8 years of professional experience and 18.6 years of University teaching experience.

Facts at a Glance Q1 2024

> The College of Business and IT Industry Advisory Council shares feedback on what is happening in the workplace and what we may have to anticipate for future needs. Their insights help us prioritize opportunities for our program initiatives so we can continue to serve our students well."

DORIS SAVRON, MBA
Vice Provost – Colleges, Assessment and Curriculum

Our faculty

Our IT faculty know what works in the real world. They include CIOs, CISOs, CTOs and directors working in the fields they teach.

The practical knowledge they bring to the classroom means that what they teach today you can apply tomorrow.

Industry Advisory Council

Education never stands still. That's why we have an advisory council made up of IT leaders. They meet periodically to review industry needs and trends, providing valuable insights that help us keep our programs relevant.

CBIT Industry Advisory Council
In April 2024, the College of Business and IT Industry Advisory Council met on the University of Phoenix main campus. Some of the council's business and IT leaders are pictured here, from left to right.

Back row: Stephanie Benoit-Kurtz – regional director of security and security consultant, Trace3; Lead Faculty, University of Phoenix; Jennifer Mellor – chief innovation officer, Greater Phoenix Chamber of Commerce; Shawn Harrs – executive VP and CIO, Red Lobster Restaurants; Michael Echols – VP, global cybersecurity strategy, Las Vegas Sands Corp.; Jim Rice – VP, digital transformation, CDW Corp.; Matthew Rosenquist – chief information security officer, Eclipz.io, Inc.

Front row: Stephenie Gloden, SVP, head of enterprise agile and enablement, Fidelity Investments; Jeffery Rhymes, VP, global technology diversity, equity and inclusion lead, JPMorgan Chase & Co.; Bob Collins, regional president, Central Plains region, Sysco

WHO WE SERVE:

Diverse, determined students and alumni

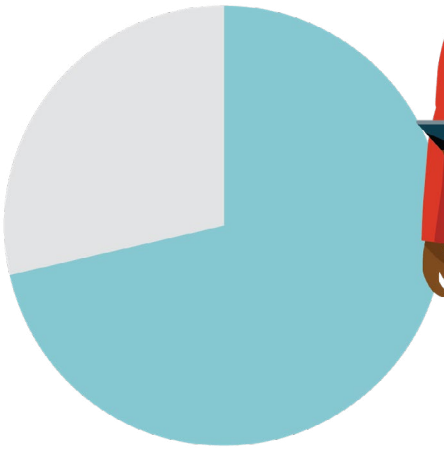

02

Request information and we'll reach out directly.
Call: 844-460-1285 | enrollment@phoenix.edu

Our tech students

Our students are as diverse as they are determined — and most of them went to the school of life before taking their first class with us.

EMPLOYMENT

Employed – 71.5%

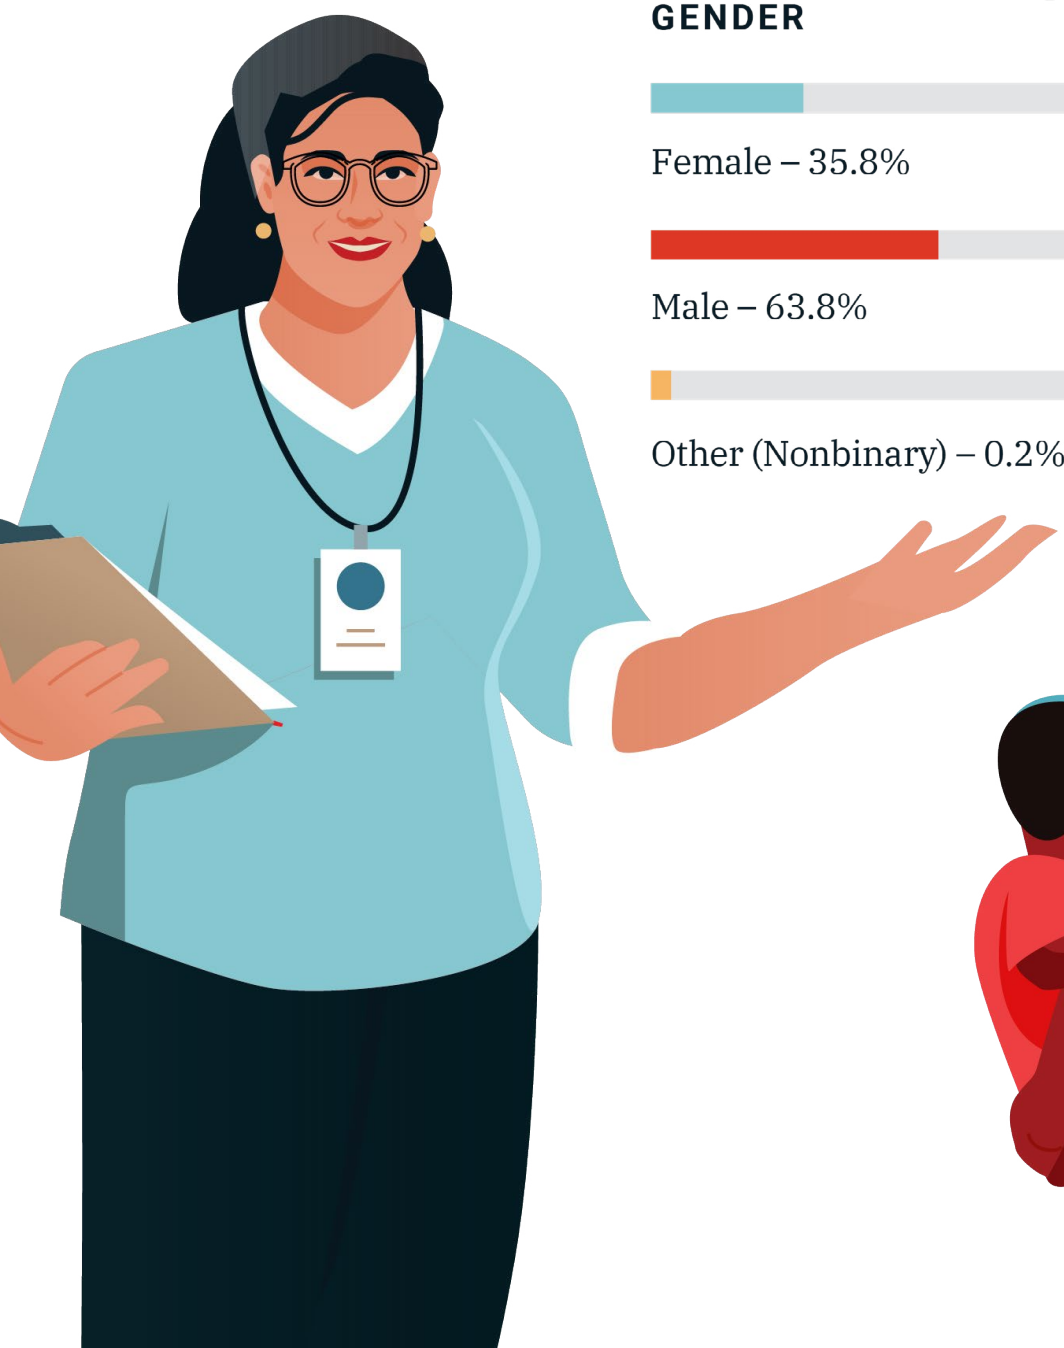

GENDER

Female – 35.8%

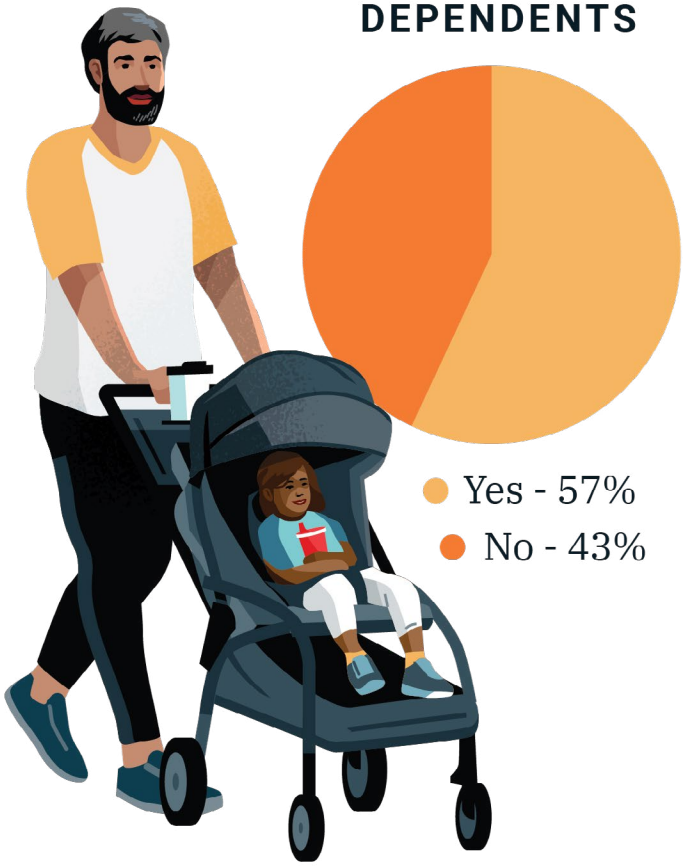

Male – 63.8%

Other (Nonbinary) – 0.2%

DEPENDENTS

- Yes - 57%
- No - 43%

ETHNICITY

- African American – 32%
- Asian/Pacific Islander – 3.5%
- Caucasian – 40.7%
- Hispanic – 17.4%
- Native American/Alaskan – 1.1%
- Other/Unknown – 5.3%

AVERAGE AGE **35***

Somewhere in these overlapping circles of statistics, our students can be found heads down, grinding through deadlines, fatigue and doubts about whether they'll make it — until, in true Phoenix form, they rise to pursue their goals.

*Statistics current as of the first quarter of FY25

Our tech alumni

We strive every day to help move our students toward graduation. And through our Career Services for Life® commitment and 50 alumni chapters, for example, we continue to serve our students long after they graduate.

We're here for our students from day one until day done. Because once you're a Phoenix, you're a Phoenix for life.

Tech alumni in action

We never get tired of shouting our alumni stories from the rooftops. They're proof a degree is possible with the right mindset and support.

Kesha Williams (MIS) started building programs in high school. Now, she's a software engineer.

Zachariah Bowen (BSIT), now a cyber systems architect, once dreamed of making his own work schedule. After earning his BSIT, he is doing just that.

Jacob Bruce (BSIT), an IT compliance analyst, balanced becoming a new father while earning his BSIT.

WHAT WE DO:

Skills-aligned education

03

Request information and we'll reach out directly.
Call: 844-460-1285 | enrollment@phoenix.edu

Like our students, we're always pressing, never resting. In fact, from our earliest beginnings as a university that changed higher education, University of Phoenix has embraced excellence and innovation.

Here are just some of the features of a degree in technology from University of Phoenix.

Did you know? Among surveyed alumni who graduated in the past year, 81% believe their University of Phoenix education has been useful in their profession*.

*2023 Biennial Alumni Survey, May-June 2023 (1,291 completes)

Skills-aligned learning

Following our dynamic and institution-wide shift to skills-aligned learning, 100% of our associate, bachelor's, master's and certificate programs open for new enrollment are now aligned to career-relevant skills.

Career-focused education

Your degree should match your goals. At University of Phoenix, it can. You can earn two credentials at the price of one for your BSCS, BSDS or BSIT. Plus, you could add CERT/CND or ASCYB to your BSCYB program. Customize your degree with a certificate option (certificate courses are taken as electives and added as a credential).

Flexibility

Balance it all — work, family and school — with a university built for busy adults like you. Focus on just one 5 to 6 week course at a time, while staying on track toward graduation. Plus, you can complete schoolwork day or night with 24/7 access to your online classes.

Career Services for Life® commitment

Whether a student or a graduate, you have access to career services including 1-on-1 career coaching at no cost, resumé reviews and interview prep — for a lifetime. Through every career pivot, we're here for you.

Competency-based MIS

If you have previous experience, prefer to work more independently and want to control how fast you complete courses, a competency-based program may be ideal for you. Not sure whether a traditional MIS or a competency-based MIS is better for you? Visit our competency-based MIS page and scroll down to take our learning style quiz.

Providing accredited higher education for 45+ years

Accreditation ensures higher education institutions meet acceptable quality standards. We stand behind your education with our history of achieving that benchmark.

Institutional accreditation

Accreditation is an independent evaluation of educational quality and rigor. University of Phoenix is accredited by the Higher Learning Commission (hlcommission.org), an institutional accreditation agency recognized by the U.S. Department of Education. University of Phoenix has been continuously accredited by the Higher Learning Commission since 1978. The Higher Learning Commission (HLC) is recognized by the Council for Higher Education Accreditation (CHEA), which is a nonprofit organization focused on promoting academic quality through formal recognition of higher education accrediting bodies. HLC's CHEA recognition was reaffirmed in 2015.

What it means for our students:

You'll receive an education that meets recognized quality standards.

Paige F.
BSIT/ASD 2017

We offer IT programs at the associate, bachelor's and master's degree levels in growing fields such as cybersecurity, software development, computer science and data science. All of our programs are aligned to careers, so you'll know that what you're learning in the classroom is relevant for your career.

Take a look at our programs, outlined in detail in the following pages.

Athena D.
BSIT 2009

Bachelor of Science in Information Technology (BSIT)

With our Bachelor of Science in Information Technology, you'll develop career-relevant skills in operating systems, cybersecurity, programming and more. Learn how to apply information technology theories and practices to real-world business challenges, with an option to customize your degree with a certificate in cybersecurity, software development, cloud computing and more.

Certificates:

- Advanced Software Developer
- Advanced Cybersecurity
- Cloud Computing
- Cyber and Network Defense
- Information Assurance and Security
- Scripted and Compiled Programming Languages

*Your time to completion is dependent on various factors specific to you, and could take you less time or more time to complete. Students who remain in attendance without breaks, pass all courses, bring in transfer credits, complete a Prior Learning Assessment (PLA) or use other time-saving opportunities may finish the program in less than four years.

* CompTIA is a registered trademark of Computing Technology Industry Association Inc. EC-Council is a registered trademark of International Council of E-Commerce Consultants DBA EC-Council Corporation.

Program details:

- Our most transfer friendly program — you can transfer up to 87 credits, which can cover over 70% of your degree.
- Customizable – add a certificate for no additional time or cost.
- Students can apply for a scholarship
- Students can have relevant work and life experience reviewed for potential credit.
- The Bachelor of Science in Information Technology prepares you to sit for select industry certification exams through the Computing Technology Industry Association (CompTIA®) and International Council of E-Commerce Consultants (EC-Council®).
- This program is available in a Direct Assessment format where you control the pace. You can take two, three or four courses at a time over a 12-week term with one-flat rate per term. The faster you go, the faster you'll finish your program. You will need 30 transfer credits or three years of full-time IT-related work experience to enter this program. Talk to an Enrollment Representative for more details.

At a glance:

- Tuition: $1,364/course ($398 Cost per credit x 3 Credits per course + $170 Resource fee)
- 120-credit program
- Program length: 4 years*
- Course frequency: Take one 5-week course at a time, while staying on track to graduate

Want to see more?
Check out our academic catalog.

Bachelor of Science in Computer Science (BSCS)

The Bachelor of Science in Computer Science prepares you for the foundational knowledge you need in the field of IT. Develop core skills in programming and networking and gain a deeper understanding of artificial intelligence (AI) and big data. Learn to apply computer science theory to real-world business challenges, including writing and presenting your app to your peers. You can also use elective courses to earn a certificate in cybersecurity, networking, cloud computing and much more.

Certificates:

- Advanced Software Developer
- Advanced Cybersecurity
- Cloud Computing
- Cyber and Network Defense
- Information Assurance and Security
- Scripted and Compiled Programming Languages

*Your time to completion is dependent on various factors specific to you, and could take you less time or more time to complete. Students who remain in attendance without breaks, pass all courses, bring in transfer credits, complete a Prior Learning Assessment (PLA) or use other time-saving opportunities may finish the program in less than four years.

Program details:

- The degree is customizable – add a certificate for no additional time or cost.
- Students can apply for a scholarship.
- Accepts up to 85 transfer credits (up to 70% of your bachelor's degree)
- Students can have relevant work and life experience reviewed for potential credit

At a glance:

- Tuition: $1,364/course ($398 Cost per credit x 3 Credits per course + $170 Resource fee)
- 120-credit program
- Program length: 4 years*
- Course frequency: Take one 5-week course at a time, while staying on track to graduate

Want to see more?
Check out our academic catalog.

Bachelor of Science in Cybersecurity (BSCYB)

Our Bachelor of Science in Cybersecurity helps prepare you to play a vital role in stopping cyber threats. As an IT security professional, you'll build secure firewalls, detect hacker attacks and maintain system protection. Expand your knowledge and skill development through cybersecurity courses in one of two specializations: Cybersecurity Operations or Cybersecurity Analyst Defender. Become the guardian of an organization's most valuable asset — its data.

Did you know? University of Phoenix is starting a student chapter with WiCyS (Women in Cybersecurity).

*Your time to completion is dependent on various factors specific to you, and could take you less time or more time to complete. Students who remain in attendance without breaks, pass all courses, bring in transfer credits, complete a Prior Learning Assessment (PLA) or use other time-saving opportunities may finish the program in less than four years.

Program details:

- Students can apply for a scholarship
- Accepts up to 75 transfer credits (over 60% of your bachelor's degree)
- Can add CERT/CND and also transfer credits from our ASCYB
- Students can have relevant work and life experience reviewed for potential credit.
- Get ready for cybersecurity EC-Council certification exams. Your Bachelor of Science in Cybersecurity content will prepare you for select EC-Council certification exams.

Your EC-Council benefit includes:

- 50%+ discounts on exam vouchers for industry certification exams
- Ability to bypass required exam application when you take our courses
- Content developed by the EC Council using the council's own materials and labs — all aligned to several industry certifications. Learn more.

At a glance:

- Tuition: $1,364/course ($398 Cost per credit x 3 Credits per course + $170 Resource fee)
- 120-credit program
- Program length: 4 years*
- Course frequency: Take one 5-week course at a time, while staying on track to graduate

Want to see more?
Check out our academic catalog.

Bachelor of Science in Data Science (BSDS)

With a Bachelor of Science in Data Science, you'll gain the fundamental knowledge needed to analyze, manipulate and process datasets using statistical software. Learn extract, transform and load (ETL) processes for integrating datasets for business intelligence platforms. Discover techniques to transform structured and unstructured datasets into meaningful information to identify patterns and drive strategic decision-making.

Certificates:

- Advanced Software Developer
- Advanced Cybersecurity
- Cloud Computing
- Cyber and Network Defense
- Information Assurance and Security
- Scripted and Compiled Programming Languages

*Your time to completion is dependent on various factors specific to you, and could take you less time or more time to complete. Students who remain in attendance without breaks, pass all courses and bring in transfer credits, Prior Learning Assessment (PLA) or other time-saving opportunities may finish the program in less than four years.

Program details:

- The degree is customizable — add a certificate for no additional time or cost.
- Students can apply for a scholarship.
- Accepts up to 72 transfer credits (up to 60% of your bachelor's degree)
- Students can have relevant work and life experience reviewed for potential credit
- **A faster path to a MBA, MM, MIS or MSDS:** BSDS students who want to transition into the University's Master of Business Administration (MBA), Master of Management (MM), Master of Information Systems (MIS) or Master of Science in Data Science (MSDS) programs may complete the first three graduate-level courses as part of their electives while finishing their bachelor's degree.

This means you will already be 9 credits/18 weeks into your master's degree when you complete your bachelor's.

At a glance:

- Tuition: $1,364/course ($398 Cost per credit x 3 Credits per course + $170 Resource fee)
- 120-credit program
- Program length: 4 years*
- Course frequency: Take one 5-week course at a time, while staying on track to graduate

Check out our academic catalog.

Thomas A.
BSIT/ISS 2018

Master of Information Systems (MIS)

Go beyond building computers and managing your queues with a Master of Information Systems, and learn career-relevant skills. This program teaches you technical and leadership skills you need to develop and manage these systems. In our traditional MIS program, you'll take one 6-week course at time, while completing your degree in as little as 17 months.

Program details:

- Students can apply for a scholarship.
- Time and money savings: The program accepts up to 12 transfer credits, which can be a combination of eligible transfer credits or credit for relevant work and life experience (Prior Learning Assessment).
- No SAT/GMAT/GRE requirement
- **A faster path to a doctoral degree:** Master's degree students can substitute up to three select graduate-level courses with designated doctoral-level courses through the doctoral pathway. This means you can already be 9 credits/24 weeks into your doctoral degree when you complete your master's.

At a glance:

- Tuition: $2,289/course ($698 Cost per credit x 3 Credits per course + $195 Resource fee)
- 36-credit program
- Program length: 17 months
- Course frequency: Take one 6-week course at a time, while staying on track to graduate

Want to see more?
Check out our academic catalog.

Master of Information Systems (Competency-Based)

Solving complex IT problems is your passion. So why stop there? From systems analysis and development to IT security and ethics, our Master of Information Systems (Competency-Based) is designed to equip you with 36 key skills to help solve even bigger problems — and influence the way businesses use IT. In our competency-based program you can earn your degree in under a year and for less than $11K.

Not sure which MIS format is right for you? Visit our competency-based MIS page and scroll down to take our learning style quiz!

Program details:

- Time and money savings: Since this is our most affordable degree option, it does not allow for transfer credits.

- **Competency-based requirements:**
  - A bachelor's degree, or higher, in business, computer science, information technology, or a related field (cybersecurity, engineering, etc.)
    - A minimum equivalent of three years of full-time IT experience or professional administrative, operational, leadership or management work experience within the past 10 years in an IT/business-related environment.
  - A bachelor's degree, or higher, in any discipline from a college or university with approved institutional accreditation
    - A minimum equivalent of five years of full-time IT or professional administrative, operational, leadership or management work experience within the past 10 years in an IT/business-related environment.

- No SAT/GMAT/GRE requirement.

At a glance:

- Tuition: Estimated program cost $10,800 ($300 per credit x 36 credits)
- 36-credit program
- Program length: Complete in under a year
- Course frequency: Take up to four courses over a 16-week period, while staying on track to graduate

Want to see more?
Check out our academic catalog.

Master of Science in Cybersecurity (MSCYB)

Data is everywhere, and companies need cybersecurity experts to protect it. With our Master of Science in Cybersecurity, you'll gain a deeper understanding of cybersecurity and operations at an enterprise level. You'll take just one 6-week course at a time, so you can balance work and life on the path to your degree.

Program details:

- Students can apply for a scholarship
- Time and money savings: The program accepts up to 12 transfer credits, which can be a combination of eligible transfer credits or credit for relevant work and life experience (Prior Learning Assessment).
- **A faster path to a doctoral degree:** Master's degree students can substitute up to three select graduate-level courses with designated doctoral-level courses through the doctoral pathway. This means you can already be 9 credits/24 weeks into your doctoral degree when you complete your master's.

At a glance:

- Tuition: $2,289/course ($698 Cost per credit x 3 Credits per course + $195 Resource fee)
- 39-credit program
- Program length: 18 months
- Course frequency: Take one 6-week course at a time, while staying on track to graduate

Want to see more?
Check out our academic catalog.

Master of Science in Data Science (MSDS)

Strategically apply data science to optimize functionality, scalability and system performance. Plus, gain career-relevant skills in topics like artificial intelligence, database administration, data warehousing, data visualization, machine learning, statistical analysis and more.

Program details:

- Students can apply for a scholarship
- Time and money savings: The program accepts up to 12 transfer credits, which can be a combination of eligible transfer credits or credit for relevant work and life experience (Prior Learning Assessment).
- **A faster path to a doctoral degree:** Master's degree students can substitute up to three select graduate-level courses with designated doctoral-level courses through the doctoral pathway. This means you can already be 9 credits/24 weeks into your doctoral degree when you complete your master's.

At a glance:

- Tuition: $2,289/course ($698 Cost per credit x 3 Credits per course + $195 Resource fee)
- 39-credit program
- Program length: 18 months
- Course frequency: Take one 6-week course at a time, while staying on track to graduate

Associate of Arts with a concentration in Information Technology

Put your passion for information technology into practice. The Associate of Arts with a concentration in Information Technology introduces you to IT concepts and principles in programming, data analytics, cybersecurity and networking. Learn the essential foundation of technical skills necessary for additional skill-building as you enter the IT field.

Program details:

- Time and money savings: The program accepts up to 45 transfer credits, which can be a combination of eligible transfer credits or credit for relevant work and life experience (Prior Learning Assessment).
- All 60 credits are fully transferable into our Bachelor of Science in Information Technology.

At a glance:

- Tuition: $1,364/course ($398 Cost per credit x 3 Credits per course + $170 Resource fee)
- 60-credit program
- Program length: 2 years
- Course frequency: Take one 5-week course at a time through the entire year

Want to see more?
Check out our academic catalog.

Associate of Science in Cybersecurity

The International Council of E-Commerce Consultants (EC-Council®) and University of Phoenix teamed up to launch the Associate of Science in Cybersecurity degree and elective courses that align with three EC-Council certification exams: Certified Ethical Hacker (CEH), Certified Network Defender (CND) and Certified Secure Computer User (CSCU). Awarded EC-Council's Academic Circle of Excellence (2019–2023) as a result of this partnership, this program is designed to help you develop skills and techniques needed to defend the cyber domain.

Program details:

- Time and money savings: The program accepts up to 45 transfer credits, which can be a combination of eligible transfer credits or credit for relevant work and life experience (Prior Learning Assessment).
- All 60 credits are fully transferable into our Bachelor of Science in Information Technology

At a glance:

- Tuition: $1,364/course ($398 Cost per credit x 3 Credits per course + $170 Resource fee)
- 60-credit program
- Program length: 2 years
- Course frequency: Take one 5-week course at a time through the entire year

EC-Council is a registered trademark of International Council of E-Commerce Consultants DBA EC-Council Corporation.

Certificates

Certificates allow you to focus on skills you need for your career in a short amount of time. Many of our certificates can be completed in less than nine months for just over $10K, and you may be able to apply the credits toward your degree after you finish.

Undergraduate certificates:

- **Advanced Cybersecurity Certificate**
  - 18 credits / 6 courses
  - Estimated tuition: $7,164 ($398 per credit x 18 credits) + $1020 resource fee = $8184
- **Advanced Software Developer Certificate**
  - 24 credits / 8 courses
  - Estimated tuition: $9,552 ($398 per credit x 24 credits) + $1360 resource fee = $10,912
- **Cloud Computing Certificate**
  - 18 credits / 6 courses
  - Estimated tuition: $7,164 ($398 per credit x 18 credits) + $1020 resource fee = $8184
- **Cyber and Network Defense Certificate**
  - 18 credits / 6 courses
  - Estimated tuition: $7,164 ($398 per credit x 18 credits) + $1020 resource fee = $8184
- **Health Information Systems Certificate**
  - 24 credits / 8 courses
  - Estimated tuition: $9,552 ($398 per credit x 24 credits) +$1369 resource fee = $10,912
- **Information Assurance and Security Certificate**
  - 18 credits / 6 courses
  - Estimated tuition: $7,164 ($398 per credit x 18 credits) +$1020 resource fee = $8184
- **Scripted and Compiled Programming Languages Certificate**
  - 21 credits / 7 courses
  - Estimated tuition: $8,358 ($398 per credit x 21 credits) + $1190 resource fee = $9548

At a glance:

- Tuition: $398 per credit
- Take one 5-week course at a time continuously until you finish your program

(Certificates continue on the next page.)

Certificates (continued)

Post-masters certificates:

- **Post-master's Certificate in Information Systems and Technology Leadership**
  - 15 credits / 5 courses
  - Estimated tuition: $12,150 ($810 per credit x 15 credits) +$1050 resource fee = $13,200

- **Post-master's Certificate in Research Essentials**
  - 12 credits / 4 courses
  - Estimated tuition: $9,720 ($810 per credit x 12 credits) +$840 resource fee = $10,560

At a glance:

- Tuition: $810 per credit
- Take one 8-week course at a time continuously until you finish your program.

HOW WE HELP YOU SAVE:

10 time- and money-saving opportunities

04

Request information and we'll reach out directly.
Call: 844-460-1285 | enrollment@phoenix.edu

We are serious about helping you save time and money. We'll help you look for every opportunity to earn a degree faster, and for less.

Here are 10 ways we value your time, money, and life and educational experiences.

1. Transfer credits
You can transfer in up to 87 prior eligible credits for many of our bachelor's degrees. We accept eligible college credits from 5,000+ accredited institutions. We'll work with you to get every transfer credit you deserve so you don't have to spend time repeating coursework.

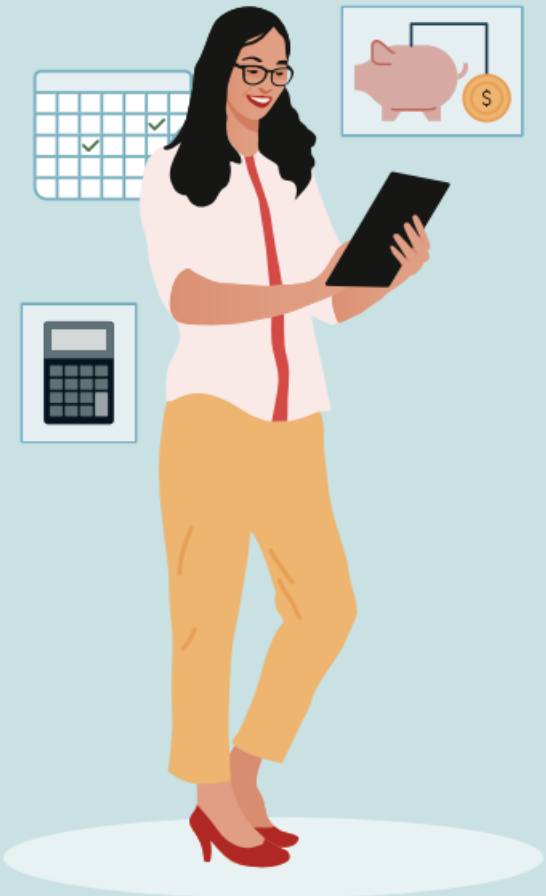

2. Prior Learning Assessment (PLA)
If you have work and life experience, you can apply to have that experience evaluated for potential college credit. For every three credits earned, undergrad students can graduate five weeks faster and save almost $1,300 off a degree. Students in our MIS, MSCYB and MSDS degree programs can get up to 12 credits, or $6,800, off with PLA and transfer credits.

3. Scholarships
Starting with your first course, every qualifying new student will be awarded one of our scholarships (or you'll get the best savings you qualify for). Scholarships are applied over a set number of courses. Maximum value is either $1,000 or $3,000, provided you maintain eligibility.

4. Employer tuition benefits
We provide education benefits to employees at more than 3,100 organizations through employer or benefits provider alliances. This can help you save money while gaining job-ready skills that benefit both you and your employer.

5. Competency-based degrees
If you're a working professional, you can leverage your knowledge and experience to earn a degree faster, and for less. Competency-based programs like our Master in Information Systems (MIS) can be completed in under a year and for less than $11,000.

6. Alternative credit providers
We accept general education and elective courses from StraighterLine, Sophia Learning and Study.com, which can reduce your overall program costs.

7. **National testing programs**
Students with expertise in a specific subject may be able to earn college credit based on their performance on national, standardized tests.

8. **Community college relationships**
Through our 3+1 Transfer Pathway, students can transfer 87 credits into a bachelor's degree — equivalent to three years — from a participating community college. We also waive tuition and the resource fee for one course, which provides students with additional savings up to $1,220.

Additionally, associate degree students who transfer into a University of Phoenix bachelor's program can save $144 on every three-credit course with our special tuition rate.

9. **Alumni savings**
Alumni are eligible for special tuition rates and can save up to $2,880 on a bachelor's degree and $2,200 on a master's degree. Additionally, there are scholarship opportunities available each month. Each scholarship has a maximum value of $2,000, applied over a set number of courses, provided students maintain eligibility.

10. **Tuition Guarantee**
At a time when costs are rising, you can count on one fixed, flat tuition rate from the moment you enroll until the day you graduate from your program. We call it our Tuition Guarantee. You can call it peace of mind.

WHAT OTHERS ARE ASKING:

Answers to FAQs

05

Request information and we'll reach out directly.
Call: 844-460-1285 | enrollment@phoenix.edu

Have a question? Chances are someone else has asked the same one! Here are some frequently asked questions.

Did you know? Each week, you'll have due dates when your discussion questions and assignments are due, but when you choose to do that work is up to you. Morning, noon or night! You won't need to log in or be expected to video conference at any time.

What can I do with a degree in technology?

Each IT degree program aligns to real-world career opportunities. Plus, we worked with labor market analysts to identify skills today's employers want in job candidates. Then we add these career-relevant skills into our curriculum.

To explore potential careers, visit our website and simply click on the Information Technology degree that interests you, scroll down to the Careers and Outcomes section of the page, then click on the "Career opportunities" drop-down menu.

Want more info on specific IT careers? View our Career Guides for a deeper dive into possible careers, salary ranges and job opportunities in these professions:

Information systems security officer
Network security analyst
Software developer

Is a technology degree right for me?

If you're looking to switch careers, upskill or enhance your career, a technology degree might be for you. That said, going back to school is a big decision. It's important to have time, a financial plan and a good support system. Chat with friends and family to see what they think. Do your research to make an informed decision.

How do I decide which degree or certificate is right for me?

Our Program Finder can help you find which program might match your career and educational goals. You can also connect with one of our enrollment representatives at 844-460-1285 for help defining your goals and brainstorming options.

How can I tailor an online Information Technology degree to fit my needs?

With our technology degree programs, you can apply your elective tracks to a select certificate so you can earn it, and a degree, at the same time.

For example, you can pursue your Bachelor of Science in Information Technology while earning a Cloud Computing Certificate. There are currently multiple certificate options to choose from at the bachelor's level. Learn more

Why are industry certification alignments important?

They help ensure you're up to speed with relevant information and prepared to take national industry certification exams.

What are Required Course of Study waivers (RCOS)?

If you already have industry certifications, you can have them assessed for potential credit toward your degree. Once you're enrolled at the University, simply send us copies of ones that may qualify for credit. The process is free, and you'll find out in days whether you've been awarded credit.

Eligible certifications are offered through CompTIA® and EC-Council®.

What are the most popular technology degrees offered at University of Phoenix?

Our Bachelor of Science in Information Technology (BSIT), Bachelor of Science in Cybersecurity (BSCYB), Master of Science in Cybersecurity (MSCYB), Master of Science in Data Science (MSDS) and Associate of Science in Cybersecurity (ASCYB) are the most popular tech degrees.

CompTIA is a registered trademark of Computing Technology Industry Association Inc.

EC-Council is a registered trademark of International Council of E-Commerce Consultants DBA EC-Council Corporation.

Did you know? For five consecutive years from 2019 through 2023, we received the Academic Circle of Excellence Award from EC-Council for our contributions to education in secure computing, network defense, ethical hacking and CISO-level leadership. In 2024, we received the EC-Council Academia Partner of the Year award for North America. EC-Council issues just one Academia Partner of the Year award each year in North America.

iGrad is a registered trademark of iGrad, Inc.

What programs align to EC Council and CompTIA certification exams?

For EC Council, we have courses aligned to certification exams in the ASCYB, BSCYB, MSCYB, BSIT, AAITT, and CERT/CND. For CompTIA, we have courses aligned to certification exams in the AAITT, BSIT, MSCYB, CERT/IAS, and CERT/CLD.

Going back to school for a technology degree seems intimidating. What resources are available to help support me?

The University offers many resources to help you stay on track in school and in life, including a support team that's available up to 14 hours a day, 5 days a week.

Active students can access the Center for Writing Excellence and the Center for Mathematics Excellence through their student portal. The iGrad® money management tool is also available at no additional cost.

Students can also access the Life Resource Center, which offers life coaching, counseling and resources, such as podcasts, webinars and articles that can help you navigate life's challenges.

How can I learn more about University of Phoenix?

A great place to start is our "About Us" page or our digital Academic Annual Report.
